Sample Solutions for Common Module 17 Problems

To illustrate how to approach and solve typical problems in Module 17, here are some sample scenarios with solutions.

Scenario 1: Consolidation of Financial Statements

Problem:

A parent company owns 80% of a subsidiary. The subsidiary reports a net income of \$200,000, and the parent's share of this income needs to be consolidated. The subsidiary's retained earnings before consolidation are \$500,000, and there are inter-company receivables of \$50,000.

Solution:

- Calculate the Parent's share of subsidiary income:

- Ownership percentage: 80%
- Share of net income: $\$200,000 \times 80\% = \$160,000$

- Eliminate inter-company receivables:

- Remove the receivable of \$50,000 from the consolidated balance sheet.

- Adjust for non-controlling interest (if applicable):

- Non-controlling interest (NCI): 20% of net assets.
- NCI share of net income: $\$200,000 \times 20\% = \$40,000$

- Prepare consolidated statement:

- Combine parent and subsidiary figures, subtract inter-company balances, and allocate net income accordingly.

Result:

The consolidated net income equals parent's net income plus subsidiary's income minus inter-company profit (if any). The NCI's share is reflected separately in the equity section.

Scenario 2: Foreign Currency Translation

Problem:

A subsidiary reports a functional currency of EUR. The subsidiary's balance sheet as of December

31, 2023, shows assets of ?1,000,000, liabilities of ?600,000, and equity of ?400,000. The exchange rate at year-end is 1 EUR = 1.2 USD. The historical rate for assets was 1 EUR = 1.1 USD.

Solution:

- Translate assets and liabilities at the closing rate:

- Assets: ?1,000,000 $\times$ 1.2 = \$1,200,000
- Liabilities: ?600,000 $\times$ 1.2 = \$720,000

- Translate equity at historical rate:

- Equity: ?400,000 $\times$ 1.1 = \$440,000

- Calculate translation adjustment:

- Difference between assets and liabilities: \$1,200,000 - \$720,000 = \$480,000
- Compare with translated equity to identify unrealized gains or losses.

- Record translation adjustments in other comprehensive income (OCI):

- Adjust for the difference in the equity section as per IAS 21.

Result:

The translation process results in a foreign currency translation adjustment that is recognized in OCI, affecting the consolidated financial statements.
