Analyzing Sample Questions from the 2014 January Paper

Example 1: Multiple Choice

Question: Which of the following is a method of encrypting data?

- A) Compression
- B) Hashing
- C) Symmetric encryption
- D) Fragmentation

Analysis: The correct answer is C) Symmetric encryption, which is a common method of encrypting data. This question tests basic understanding of data security concepts.

Example 2: Short-answer

Question: Explain why data is often compressed before transmission over a network.

Sample Answer: Data is compressed to reduce its size, which decreases the time needed for transmission and conserves bandwidth. Compression can improve efficiency and reduce costs,

especially when transmitting large files.

Example 3: Programming/Algorithm

Question: Write a pseudocode algorithm to find the largest of three numbers entered by the user.

Sample Pseudocode:

```

Input number1

Input number2

Input number3

If (number1 >= number2) AND (number1 >= number3) then

largest = number1

Else if (number2 >= number1) AND (number2 >= number3) then

largest = number2

Else

largest = number3

Output largest

```

Analysis: This question assesses logical reasoning, understanding of control structures, and the ability to translate problem statements into pseudocode.

Example 4: Extended Response

Question: Discuss the ethical considerations of storing personal data online.

Sample Discussion: Storing personal data online raises privacy concerns, as data might be accessed or misused without consent. It is important to implement security measures, obtain user

consent, and adhere to legal regulations such as data protection laws to ensure ethical handling of sensitive information.
